SPINE

RAINBOW CERVICAL SPINE SETS

The new Rainbow Cervical Spine Sets, made of Titanium and therefore MRI and X-Ray resistant, allow the surgeon to work more safe and efficient.

During surgery, fast and secure selection, assembling and disassembling becomes possible by different colors on the valves for length marking and by a well-organized set. The retractor arms fit optimal to the human anatomy with the double joints, suitable for single and multi-level retraction.

Advantages:

- MRI and X-ray resistant titanium
- different colours for length marking
- non-glare finish
- double-joint retractor arms
- suitable for single and multi level retraction
- quick and secure assembling and disassembling
